How To Judge A Good Wiltshire Horn Sheep

(Male & Female Horned)

Before you start

Stand back and have a good look at the sheep from a distance. Get a general impression of the ram or ewe you may be interested in buying, appearance, poise, etc. Pay close attention to how it walks.

The sheep needs to be healthy with length, width and depth of body; she needs to eat, walk and feed two lambs. So the order of checking is:

- 1) **Teeth** – eating is essential
- 2) **Feet** – need to be able to walk to find food
- 3) **Udder** – to rear two lambs
- 4) **Testes** – in a breeding ram

Remember: to handle animals at the key points:

- ✗ Swellings, hard lumps or sores
- ✗ Excessively large teats

Testicles – male
